Past

6851141
Wisconsin Motor Vehicle
Accident Report

Accident Number: 6851141
Date: 11/27/74
Time: 11:27
Location: SIDELL AVE
City: GREENWOOD WI 53022

Driver: KASTY
Address: 330 W. BARLEY ST
City: GREENWOOD WI 53022

Other Driver: SCHWARTZ, MARY
Address: 551 ROOF ST
City: GREENWOOD WI 53022

Vehicle 1: 1968 Oldsmobile Delta 88
Vehicle 2: 1968 Oldsmobile Delta 88

Accident Description: ...

Paper crash report backlogs in Texas. (GAO-10-454)

People & Training

- According to the CDIPG, one refrain commonly heard from police is that “crash forms are being completed just for insurance companies”

- *WisDOT MV4000 Instruction Manual*

- Primary training resource for WI officers

- Last updated in 1998

- Brief and vague concerning engineering fields

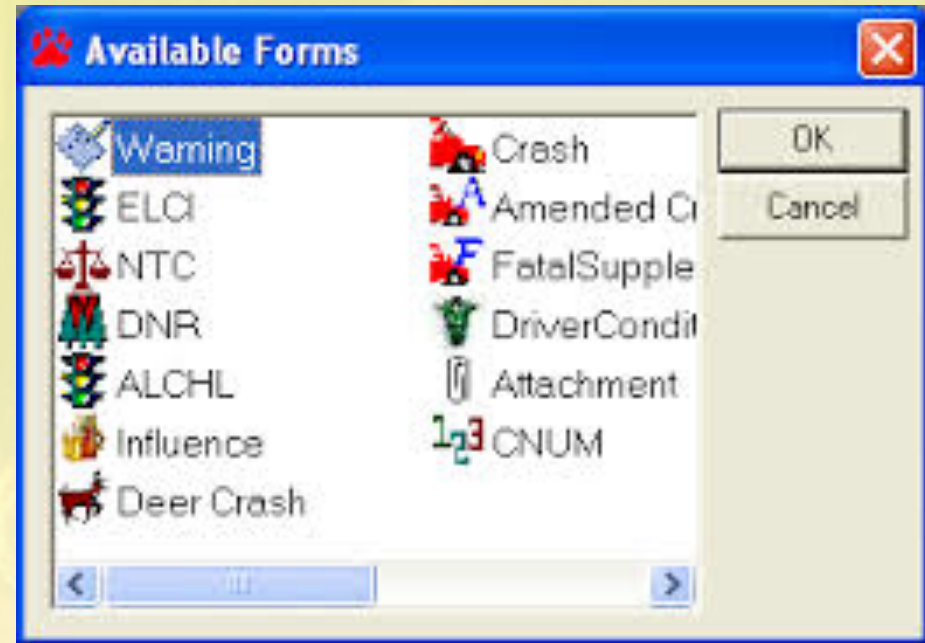

- No baseline definition of when to flag hills or curves

- Poor definition of traffic barrier

- No discussion of roundabouts

Present

Help Screens

TraCS has built-in help screens that can be accessed for a data field by pressing the <F2> key. Help is available for each of the forms in the suite.

The Help button on the toolbar brings up information about the TraCS software, in general.

Engineering Elements Data Quality Audit

- Low accuracy for access control at partially controlled facilities indicates a lack of understanding by officers for what qualifies as partial control
- When hills or curves are present on at least one approach, officers are flagging them even when they are not the site of the crash, which is incorrect
- Low traffic-way accuracy is a result of misunderstanding what constitute divided roadways and barriers
- Roundabout-specific inaccuracies were especially noteworthy in the horizontal curve and traffic-way fields

WisTransPortal Overview

- **Objectives**

- Archived Data Management
- Real-Time Data Exchange
- Centralize Access to Data
- Data / Systems Integration
- IT Test Bend Environment
- Research / Government Shared Objectives

WisTransPortal Overview

- **Data Sources**

- Traffic Data
- Crash Data
- Traffic Incidents
- Lane Closures
- Traffic Video
- ITS Inventory
- Road Weather Data
- Roadway GIS Inventory

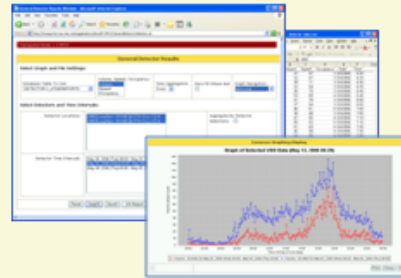

WisTransPortal Software Systems

Crash Data Retrieval Facility

Query retrieve statewide MV4000 crash data (1994-present) and police crash reports (2000-present). Data is updated on a monthly basis through coordination with WisDOTDMV. Adding highway and local road GIS crash map in 2012.

V-SPOC Traffic Detector Data

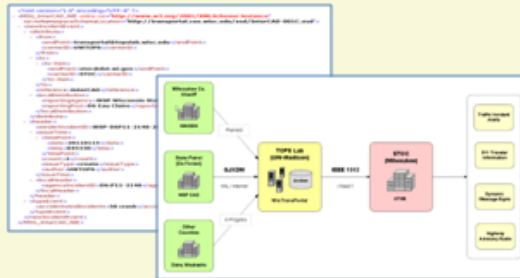

Query and retrieve freeway traffic detector data from the WisDOT Statewide Traffic Operations Center (STOC). Contains a complete archive of detector data from the STOC since 1996. Database is updated on a 24-hour basis.

Wisconsin Lane Closure System

Online acceptance and reporting system for lane closures and restrictions statewide. Tracks closure details for all construction, maintenance, permit, special event, and emergency closures on major state highways. Sends closure data in real-time to 511.

InterCAD Traffic Incident Data

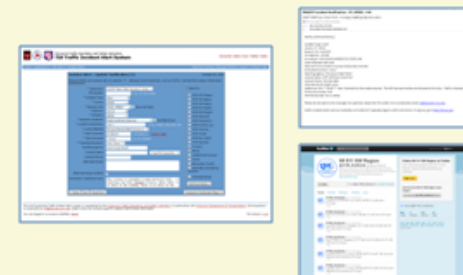

Wisconsin State Patrol dispatch to Statewide Traffic Operations Center control room traffic incident data exchange. Provides real-time data transfer, GJXDM to IEEE 1512 XML translation, and incident data archiving. Adding Dane and Waukesha Counties in 2012.

LINK Freeway Traffic Video

Agency video-sharing and real-time traffic conditions. Provides web-based access to WisDOT traffic video for public safety, emergency services, towing, media, and others. Connects directly to WisDOT CCTV network through the ITS fiber backbone (ITSNET).

TIA Traffic Incident Alerts

Statewide traffic incident notification system. Sends email, fax, and Twitter alerts to the media and others. Also handles traffic related media releases and EOC activation alerts. Jointly administered by the Statewide Traffic Operations Center and Wisconsin State Patrol.

University of Wisconsin-Madison

THE UNIVERSITY
of
WISCONSIN
MADISON

- Weed out fields that had become obsolete and identify others that were not being collected (i.e. roundabouts or cell phone use)
- Form is more intuitive and that there is a great savings at both the state and local level by gathering correct and accurate data
- Easily describe what happened (i.e., cell phone usage, roundabouts, cross median crashes)

Crash Database - Objectives

- Implement the Revised Crash Form
- Streamline Crash Data Processing
- Modernize the Data Management System
- Improve Crash Data Quality – MMUCC / MIRE
- Take Full Advantage of the TraCS Incident Locator Tool (ILT)
- Enhance Crash Data Access and Interoperability
- Linking the Old and New Crash Data
- Support More Frequent Updates to the Crash Form

Crash Database - National Perspective

- The Performance “Six Pack”
 - Timeliness
 - Accuracy
 - Completeness
 - Consistency
 - Accessibility
 - Integration

Traffic Safety Information Systems

Crash Database - Components

- Oracle Database 12c Enterprise Edition
- TraCS Web Services
- Web Based Resolve System

Crash Database - Timeline

Elements and Attributes	March 2015
High Level Requirements	June 2015
Crash Data Dictionary	September 2016
Revised TraCS Crash Form	December 2015
Database System Development	October 2015 – June 2016
Testing and Acceptance	July 2016
Law Enforcement Training	August – October 2016
Law Enforcement TraCS Patch	October – December 2016
Go Live	January 1, 2017

Crash Database - Future

- Improve Crash Mapping and Analysis Capabilities
- Include Photos & Attachments to the Crash Report
- Linkages to Federal Systems (FARS, FMCSA)
- Linkages to External Data (EMS, Roadway)
- Include Additional TraCS Forms
- Research and Innovation
 - To enable analysis and decision making through downstream application

- All crash reports will need to be submitted electronically through TraCS 10 as of January 1, 2017 on the new crash report form.
- Agencies that currently do not have TraCS or are not using TraCS 10 should e-mail badgertracs@dot.wi.gov with questions.
- Training will be available and provided to law enforcement agencies across the state in the second half of 2016.
